

Given a price, write a program to calculate the the QST (10%), GST (5%), and the total price. Print the original and total prices in French Canadian format, and the taxes in percentage.

```
double originalPrice = 11.575;  
final double QST = 0.1;  
final double GST = 0.05;
```

```
// RESULT:
```

```
/*
```

```
Price: 11,57 $
```

```
QST (10%): 1,16 $
```

```
GST (5%): 0,58 $
```

```
Total Price: 13,31 $
```

```
*/
```
